To whom it may concern

Subject: Health Research Work Experience -Raahim Salman Abdul Ghaffar

It is a pleasure to write a reference for Mr. Raahim Salman Abdul Ghaffar, who in his voluntary capacity, worked as a research team member/coordinator on several research projects under my supervision at Aga Khan University School of Nursing and Midwifery Pakistan since April 2022.

His performance was exceptional, especially with regards to ensuring the timely completion of tasks assigned to him. During his tenure Mr. Raahim, contributed to research planning, defining research inquiries, alongside ensuring strict adherence to ethical standards and guidelines. He also worked closely with the data collection team to ensure the quality of the data collection process. His work has been supported by his proficiency in administrative and computer skills. He is a good team player and possesses strong interpersonal skills which were demonstrated through smooth working relationship project personnel to ensure productive work environment.

I am confident that the academic preparedness and experience in health research alongside exceptional communication and interpersonal skills, Raahim Salman Abdul Ghaffar will be an asset to contribute significantly to the success of any health research initiatives.

For any further query kindly contact, me on details given below.
